

**Employer/Educator Internship Project**  
**Best Practice - 2005**  
**Southeast Texas Tech Prep**

**Employer/Educator Internship Project** — The purpose of this project is to provide teachers in Southeast Texas an opportunity to participate in work-based experiences and to develop or enhance and understanding of the application of their subject matter to actual work settings. Teachers spend 28 hours observing and interviewing in modern, high performance work places. At the conclusion of the project, teachers attend one day of debriefing activities in which they present a minimum of four lesson plans or classroom activities suitable for use in the classroom that reflect related rigorous academics. Lesson plan development will be consistent with corresponding TEKS student expectations and exit level TAKS objectives. Interns (teachers) are encouraged to make presentations during professional development workshops/seminars for other interested teachers from his/her district or other appropriate conferences.
